PROFESSIONAL SUMMARY

A dynamic Software Developer with expertise in JavaScript, React, Redux, TypeScript, Node.js, Express, and MongoDB. I excel in problem-solving and teamwork, thriving in fast-paced environments. My experience includes the Mealmaster project, where I built applications that enhance user interaction and functionalities, demonstrating my ability to deliver efficient solutions.

EDUCATION

Masai School
Software Developer
Present
Christ Church College, Kanpur
Postgraduate in Zoology
Jul 2024

CERTIFICATIONS

Masai School
xto10x Hackathon edition

SKILLS

Technical Skills: CSS3, RESTful APIs, Mongodb, Express.js, Node.js, Responsive Web Design, HTML5, Git, Redux, React, JavaScript

Soft Skills: Attention to Detail, Adaptability, Time Management, Teamwork, Problem Solving, Effective Communication

PROJECTS

MealMaster Project | *react, firebase, gemini ai*

- 🚀 Deployed Link : https://mealmaster01.vercel.app/login
- ○ Github Repo : https://github.com/saini-nikhil/MealMaster
- Developed a dynamic meal plan creation feature using React, allowing users to generate personalized weekly meal plans based on dietary preferences and nutrition goals.
- Integrated Firebase Authentication to enable secure user sign-up, login, and session management for a personalized experience.
- Implemented a smart grocery list generator that compiles ingredients from planned meals into an organized, editable shopping list.
- Built calorie and macronutrient tracking dashboards to help users monitor daily intake and maintain nutritional targets.
- Added meal prep reminder functionality with push notifications to support consistent meal planning habits.
